

There are several ways to plan for combined grades. Here are two options.

Method A: maintain separate plans for each grade

Method B: create one plan that merges lessons from each grade

Method A

Load a sample plan for one grade and name the plan. Repeat this and make a second plan for the other grade. (See tutorial *Using a Sample Plan.*)

The screenshot shows the Mathology web interface. At the top, there is a search bar and navigation links for Home, Favourites, Plan, Analytics, and Help. The 'Plan' menu is open, showing options for 'Most Recent Plan' and 'All Plans'. A callout box points to the 'All Plans' option, with an arrow indicating that clicking it will lead to a list of plans. Below the 'Create New Plan' button, the 'My Plans' section lists two plans: 'Gr 2 2020/2021' (last modified 2020-09-20 22:08) and 'G2. 2020' (last modified 2020-09-20 21:54). Each plan has a trash icon and a pin icon to its right.

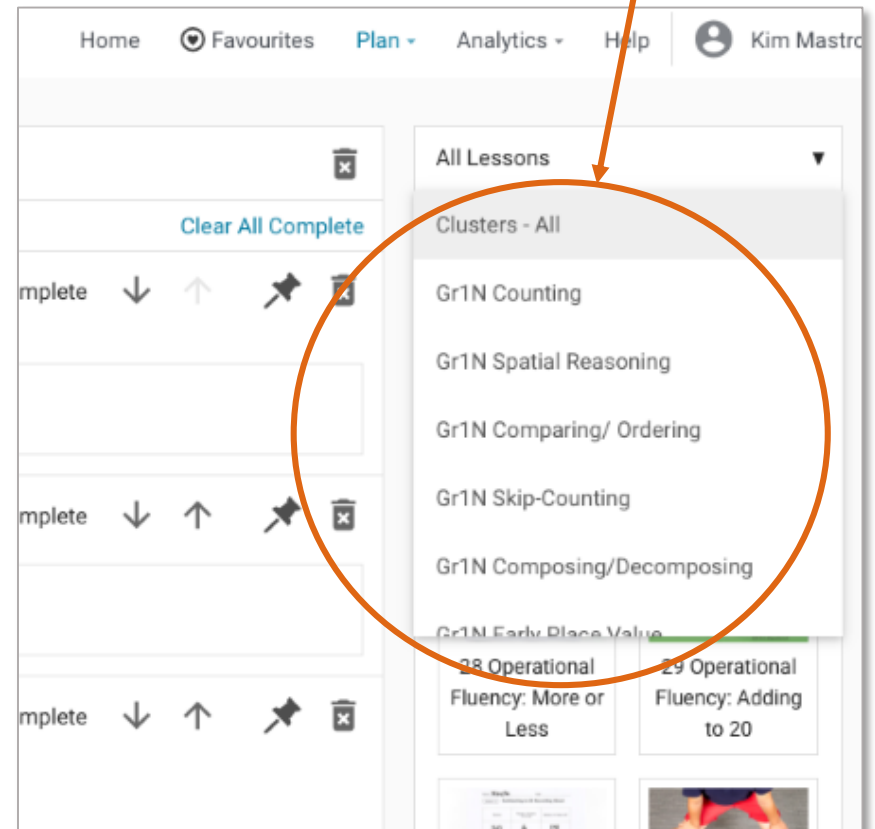

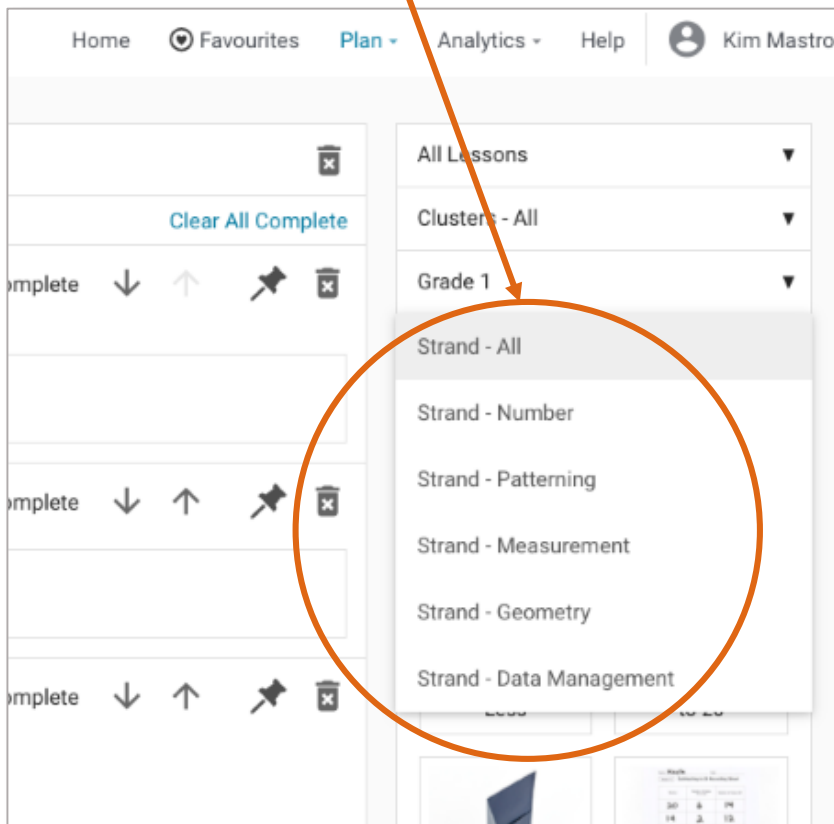

Find your plans by clicking All Plans, then search for your named plans.

Method B

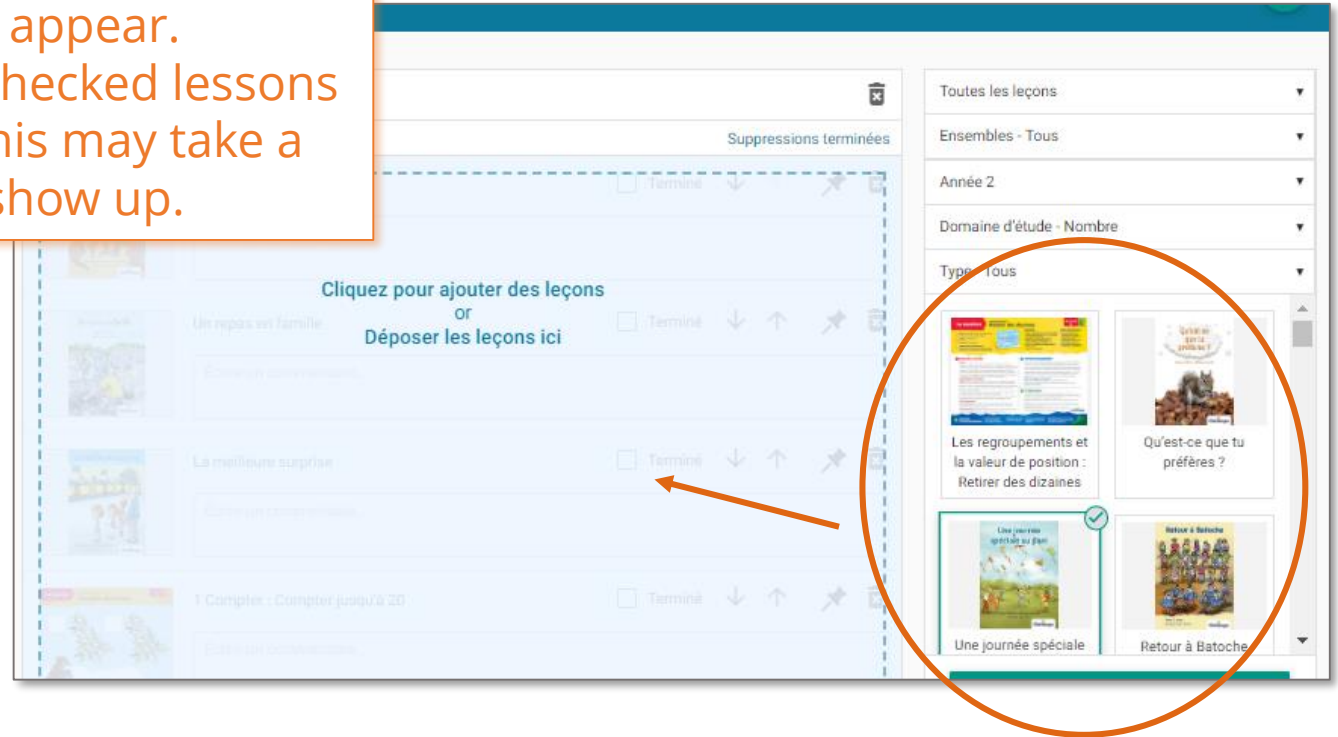

1. Choose a concept grouping from the left.
2. Select a grade from the drop-down list.

The screenshot displays the Mathology interface. At the top, there is a search bar and navigation links for Home, Favourites, Plan, Analytics, and Help. The user's name, Kim Mastron, is visible in the top right. Below the navigation bar, there is a blue header with a back arrow and the text 'Gr 2 2020/2021'. The main content area is divided into three sections. On the left, a list of concept groupings is shown, with 'Counting (Sept.)' selected and circled in orange. The other groupings include 'Number Relationships 1 (Sept.)', 'Repeating Patterns week1', 'Increasing/Decreasing Patterns (Oct.)', 'Grouping and Place Value (Nov.)', and 'Operational Fluency (Nov.)'. In the center, the 'Counting (Sept.)' concept is expanded, showing two lessons: 'What Would You Rather?' and 'Ways to Count'. Each lesson has a 'Complete' checkbox and a 'Write a comment...' field. On the right, a dropdown menu is open, showing 'All Lessons', 'Clusters - All', 'All Licensed Grades', 'Grade K', 'Grade 1', 'Grade 2', and 'Grade 3'. The 'All Licensed Grades' option is circled in orange. Two orange arrows point from the numbered instructions above to the circled elements.

2. Select a strand from the drop-down list.
3. Click on Clusters and find a cluster topic that matches similar concepts. Lessons for the topic will display.

4. Click lessons in the cluster. Checkmarks will appear.
5. Click blue box. Checked lessons will be added. This may take a few seconds to show up.

6. Once lessons are added add notes to label each grade.

Your plan will include lessons for multiple grades, each labelled with grade level.

The screenshot displays the Mathology interface. On the left, a sidebar lists lessons for 'Counting (Sept.)' with completion dates: 'Number Relationships 1 (Sept.)' (0/17), 'Repeating Patterns week1' (0/11), 'Increasing/Decreasing Patterns (Oct.)' (0/17), 'Grouping and Place Value (Nov.)' (0/11), 'Operational Fluency (Nov.)' (0/14), 'Financial Literacy (Nov./Dec.)' (0/10), '2-D Shapes (Dec.)' (0/11), 'Time and Temperature (Dec.)' (0/12), 'Number Relationships 2 (Jan.)' (0/13), and '3-D Solids (Jan.)' (0/12). The main area shows a lesson plan for 'Counting (Sept.)' with a 'Clear All Complete' button. It lists three lessons: 'What Would You Rather?' (0/17), 'Ways to Count' (0/11), and 'Repeating Patterns: Exploring Patterns' (0/12). Each lesson entry includes a thumbnail, a 'Complete' checkbox, and navigation icons. The right sidebar contains filters: 'All Lessons', 'Gr1N Counting', 'Grade 1', 'Strand - Number', and 'Type - All'. Below these filters are four lesson cards: '1 Counting: Counting to 20', '2 Counting: Counting to 50', '3 Counting: Counting On and', and '4 Counting: Ordinal Numbers'. A green button at the bottom right says '+ Add non-Mathology Lesson'.
